
IEDB assays
Endoplasmic reticulum chaperone BiP (rheumatoid arthritis)
Heat shock 70 kDa protein 1A (type 1 diabetes mellitus)
60 kDa heat shock protein, mitochondrial (type 1 diabetes mellitus)
Endoplasmic reticulum chaperone BiP (type 1 diabetes mellitus)
60 kDa heat shock protein, mitochondrial (Behcet's disease)
Alpha−enolase (rheumatoid arthritis)
Aquaporin−4 (neuromyelitis optica)
Insulin (type 1 diabetes mellitus)
Stress−70 protein, mitochondrial (type 1 diabetes mellitus)
Fibrinogen alpha chain (rheumatoid arthritis)
Glutamate decarboxylase 2 (type 1 diabetes mellitus)
Heat shock cognate 71 kDa protein (type 1 diabetes mellitus)
S−arrestin (autoimmune uveitis)
Acetylcholine receptor subunit epsilon (myasthenia gravis)
Fibrinogen beta chain (rheumatoid arthritis)
Proton−coupled zinc antiporter SLC30A8 (type 1 diabetes mellitus)
60 kDa heat shock protein, mitochondrial (rheumatoid arthritis)
Collagen alpha−1(XVII) chain (bullous pemphigoid)
Collagen alpha−1(XVII) chain (pemphigoid gestationis)
Steroid 21−hydroxylase (Addison's disease)
T cell receptor alpha chain MC.7.G5 (multiple sclerosis)
Thyrotropin receptor (Graves' disease, Graves disease)
Blood group Rh(CE) polypeptide (autoimmune hemolytic anemia)
D(2) dopamine receptor (autoimmune disease of the nervous system)
Integrin beta−3 (autoimmune thrombocytopenic purpura)
Thyroid peroxidase (Graves' disease, Graves disease)
Collagen alpha−1(II) chain (rheumatoid arthritis)
Collagen alpha−3(IV) chain (Goodpasture syndrome)
Cytochrome P450 2D6 (autoimmune hepatitis)
DNA topoisomerase 1 (systemic scleroderma)
Lupus La protein (Sjogren's syndrome)
Myelin proteolipid protein (multiple sclerosis)
Receptor−type tyrosine−protein phosphatase−like N (type 1 diabetes mellitus)
T cell receptor beta variable 4−3 (multiple sclerosis)
Thyroid peroxidase (autoimmune thyroiditis)
